

Subject Index

Volume 64

- Abbreviations**, 985
- Absorptiometry**
 dual-energy X-ray. *See* Dual-energy X-ray absorptiometry
 single-photon, effects of calcium supplement withdrawal and puberty on bone mineral mass in children, 71
- Absorption**. *See* Intestinal absorption
- Acetate**, in dialysate, L-carnitine and acetyl-L-carnitine status during hemodialysis, 922
- Acetylsalicylate**. *See* Salicylates
- Acquired immune deficiency syndrome**. *See* HIV/AIDS
- Activity**, zinc deprivation, adolescent monkey, 908
- Acute-phase proteins**, iron supplementation and vitamin A status in Pakistani infants, 694
- Acute-phase response**, in falciparum malaria, 94
- Adipose tissue**. *See* Body fat
- Adiposity**
 correlation of BIA spectrum impedance data with DXA measurements, 413S
 dietary fat intake, body fat, and intraabdominal adipose tissue, 677
 estimation, bioelectrical impedance analysis, 436S
- Adolescence**
 adolescent maturation rate and obesity, 18
 anthropometric reference data for international use, WHO Expert Committee recommendations, 650
 body fat distribution and cardiovascular risk factors in obese adolescent girls, 12
 bone mineral content, influence of body composition, 603
 calcium retention and bone biomarkers in adolescent girls, 67
 growth and maturation, effects of dietary zinc deprivation (monkey), 274
 obesity, body composition before and after weight reduction, 1
 spastic quadriplegic cerebral palsy, energy expenditure pattern, 627
 zinc deficiency, skeletal growth and maturation (Editorial), 375
 zinc deprivation
 activity and attention (monkey), 908
 growth and maturation (monkey), 274
- Age/aging**. *See also* Geriatric population
 aging, gastric acid secretion, and carotene status (Editorial), 648
 influence on waist girth and waist-to-hip ratio predictors of visceral adipose tissue, 685
 natural killer cell activity, effect of β -carotene supplementation, 772
 serum albumin and muscle mass, 552
- Albumin**
 in protein-energy malnourished children, 952
 serum, skeletal muscle mass in elderly, 552
- Alcohol (ethanol)** consumption, moderate, energy value, 108
- Amenorrhea**, lactational
 duration of, maternal dietary supplementation and (Editorial), 377
 skim milk supplementation of maternal diet, 283
- American Society for Clinical Nutrition**
 Annual Meeting award recipients, 795
 President's address: A virtual organization for nutrition in the 21st century, 796
 Young Investigator Award recipients, 795
- Amino acids**. *See also* specific amino acids
 dietary, delayed tumor onset in transgenic mice, 748
 large neutral, plasma, effect of preexercise meal composition, 778
- Amylose**, effect of high-amylose starch versus oat bran on metabolic variables and bowel function in hypertriglyceridemia, 944
- Androgen(s)**
 effect of fat and fiber consumption on plasma and urinary sex hormones in men, 850
 plasma, energy, fat and fiber intake and, in premenopausal women, 25
- Anemia**, nutritional, strategies to control (Editorial), 789
- Anthropometry**
 anthropometric reference data for international use, WHO Expert Committee recommendations, 650
 body composition of black versus white girls, 833
 body composition of peritoneal dialysis patients, 125
 waist girth and visceral adipose tissue accumulation, 685
- Antioxidants**. *See also* specific antioxidants
 carotenoid supplementation and lipid peroxidation in cystic fibrosis, 87
 curcumin, anticataractogenic activity (rat), 761
 supplementation, coronary mortality risk in elderly, 190
- Apolipoprotein E phenotype**, central obesity and, 131
- Appetite**, fluoxetine and dietary intake in overweight women, 267
- Arachidonic acid**
 fungal oil, plasma fatty acid responses, metabolic effects, and safety in health adult males, 159
 in visual and cognitive development, 40
- Arginine**, kinetics, in pediatric burn injury, 60
- Ascites**, in liver disease, bioelectrical impedance analysis, 510S
- Aspirin**. *See* Salicylates
- Atherosclerosis**, moderate weight loss and plasma plasminogen activator inhibitor type-1 in obese elderly subjects, 7
- Athletics**, BIA as an evaluation tool, 469S
- Attention**, zinc deprivation, adolescent monkey, 908
- Binge eating**, fluoxetine and dietary intake in overweight women, 267
- Bioavailability**
 calcium supplements (letter), 825
 salicylate bioavailability in food, 743
 vitamin E, water-soluble versus fat-soluble form, 329
- Bioelectrical impedance analysis (BIA)**, 387S
 in black versus white girls, 833
 biological indexes of BIA variables, 397S
 detection of sarcopenic obesity, 472S
 in diabetes mellitus, 515S
 drug pharmacokinetics, 519S
 in epidemiologic studies, 459S
 estimating adiposity, 436S
 limitations in severe obesity, 449S
 evaluation of liver disease, 510S
 as evaluation tool in athletics, 469S
 impedance spectrum and body composition, 413S
 instrumentation, overview of analyzers, 405S
 in malnutrition, 485S

- in management of critical illness, 498S
- in management of dialysis patients, 503S
- measurement conditions, 423S
- multifrequency and segmental impedance measures, 413S
- National Institutes of Health Technology Assessment Conference Statement, 524S
- in national nutrition surveys, 453S
- in nutritional assessment, 478S
- in obese children and adolescents before and after weight reduction, 1
- in peritoneal dialysis patients, 12S
- prediction of body cell mass, fat-free mass, and total body water, effects of race, sex, and disease, 489S
- prediction of physical performance, 463S
- standardization of measurements, 423S
- statistical methods to develop impedance estimates of body composition, 428S
- whole-body impedance, parameters measured, 388S
- Biological maturation**
 - adolescent maturation rate and obesity, 18
 - zinc deprivation, adolescent monkey, 274
- Biomarkers**
 - mutual benefit from biomarkers and dietary intake data (Editorial), 379
 - very-long-chain n-3 fatty acids in plasma phospholipids, dietary fish/n-3 fatty acid concentrate intake and, 30S
- Black population, body composition of young girls, 833**
- Blood pressure**
 - effect of aged garlic extract, 866
 - effect of fermented milk in hypertensive patients, 767
 - general perceived health of cardiovascular patients on prepackaged prepared meal plan, 93S
 - in women with central obesity, effect of apolipoprotein E phenotype, 131
- Body cell mass, predictive equations from BIA, effects of race, sex, and disease, 489S**
- Body composition**
 - bioelectrical impedance analysis. *See* Bioelectrical impedance analysis (BIA)
 - body dissatisfaction, body composition, and eating disorders in former gymnasts, 840
 - in continuous ambulatory peritoneal dialysis, dual-energy X-ray absorptiometry measurement, changes in peritoneal fluid and, 237
 - influence on bone mineral content in children and adolescents, 603
 - influence on bone mineral density in postmenopausal women, 354
 - in malnutrition, BIA monitoring of changes during refeeding, 485S
 - measurements in young men, comparison of two DXA instruments, 669
 - measurement techniques, 478S
 - in obese children and adolescents before and after weight reduction, 1
 - in peritoneal dialysis patients, comparison of assessment methods, 12S
 - racial differences before puberty, black versus white girls, 833
 - research, 478S
 - in spastic quadriplegic cerebral palsy, energy expenditure pattern, 627
 - statistical methods to develop impedance estimates of body composition, 428S
 - in stunted children, 137
- Body fat**
 - body dissatisfaction, body composition, and eating disorders in former gymnasts, 840
 - distribution**
 - cardiovascular risk factors in obese adolescent girls, 12
 - dietary fat intake, 677
 - nutrient balance and android body fat distribution: role for protein (letter), 663
 - regional fat patterning in relation to pubertal stage in girls, 546

 - results of a short-term, low-calcium adaptation study should not be generalized to children with persistently low calcium intakes (letter), 826
 - retention, bone biomarkers in adolescent girls and young women, 67

- supplementation
 bioavailability of supplements (letter), 825
 effect on total nutrient intake in postmenopausal women, 731
 withdrawal, effect on bone mineral mass in children, 71
- Calorimetry
 indirect
 carbohydrate oxidation in obese prepubertal children, 844
 thermogenesis in NIDDM, 78
 whole-body, macronutrient balance during over- and underfeeding, 259
- Carbohydrate(s)
 carbohydrate oxidation in obese prepubertal children, 844
 colonic digestion in short-bowel syndromes, 222
 dietary, weight loss and (letter), 823
 meal frequency and postexercise muscle glycogen storage, 115
 γ -Carboxyglutamic acid, urinary, vitamin K status, 894
- Carcinogenesis, delayed tumor onset in transgenic mice fed amino acid-based diet supplemented with red wine solids, 748
- Cardiovascular disease
 risk factors, in obese adolescent girls, relation to intraabdominal fat depot, 12
 risk reduction, general perceived health of cardiovascular patients on prepackaged prepared meal plan, 935
- Carnitine
 L-carnitine and acetyl-L-carnitine status during hemodialysis with acetate, 922
 in hemodialysis patient (Editorial), 876
- α -Carotene, serum concentrations, in children in Belize, 726
- β -Carotene
 9-cis- β -carotene metabolism, 177
 plasma, response to fruit and vegetable diets, 594
 serum concentrations
 in children in Belize, 726
 effect of gastric acidity on intestinal uptake of oral β -carotene, 622
- supplementation
 in cystic fibrosis, lipid peroxidation in, 87
 effects on enzymatic antioxidant status and glutathione status in HIV/AIDS, 101
 natural killer cell activity in elderly men, 772
- Carotenoid(s)
 plasma
 in falciparum malaria, 94
 fluctuations according to menstrual cycle phase, 559
 fluctuations according to menstrual cycle phase (Editorial), 640
 response to fruit and vegetable diets, 594
 serum concentration
 in children in Belize, 726
 nutritional characteristics, eating pathology, and hormonal status of young women, 566
 supplementation, in cystic fibrosis, lipid peroxidation and, 87
- Case-control studies, chronic low intakes of vitamin A in Nepal, 242
- Cataractogenesis, 4-hydroxynonenal-induced, protective effect of curcumin (rat), 761
- Catechin, delayed tumor onset in transgenic mice, 748
- Cerebral palsy, spastic quadriplegic cerebral palsy, energy expenditure pattern, 627
- Ceruloplasmin, plasma, in kidney dialysis patients, 757
- Cholesterol
 dietary
 effect on plasma lipoproteins, 712
 postprandial appearance in chylomicron fraction and whole plasma, 47
 postprandial lipoproteins, 361
 fortification of infant formula, effect on plasma lipids and erythrocyte membrane fatty acid pattern, 871
 plasma, response to microalgal and fungal oils, 159
 plasma lipoprotein, biological variability and responsiveness to dietary fat, 53
 serum
 in healthy normolipidemic subjects, effect of dietary resistant starch, 312
 hypocholesterolemic action of aged garlic extract, 866
- Choline, in milk and infant formulas, 572
- Chronic obstructive pulmonary disease (COPD), vitamin A status, 928
- Cirrhosis, bioelectrical impedance analysis in, 510S
- Coagulation, effects of stearic acid and myristic acid, 168
- Cobalamin, serum, in elderly women, hormone replacement therapy and, 856
- Cognitive function
 effect of preexercise meal composition, 778
 iron deficiency (letter), 120
 recognition memory in healthy full-term infants, effect of feeding formula without arachidonic acid and docosahexaenoic acid, 40
- Colon
 adaptation to daily lactose feeding in lactose maldigesters, 232
 digestive function
 fructooligosaccharides, 324
 in short-bowel syndromes, 222
- Communication, Internet and nutritional scientist, 659
- Copper, status, in kidney dialysis patients, 757
- Coronary disease
 moderate weight loss and plasma plasminogen activator inhibitor type-1 in obese elderly subjects, 7
 progression
 dietary fatty acids and, 202
 dietary influence (Editorial), 253
 protective effect of vitamin E supplementation in elderly, 190
- C-reactive protein, in acute pulmonary exacerbations of cystic fibrosis, 635
- Creatinine, plasma total homocysteine and, 587
- Critical illness
 glutamine-enriched enteral feeding, 615
 glutamine supplementation in catabolic illness (Editorial), 645
 management, bioelectrical impedance analysis in, 498S
- Cruciferous vegetables, effect on plasma lipids, 706
- Cryptoxanthin, plasma, response to fruit and vegetable diets, 594
- β -Cryptoxanthin, serum concentrations, in children in Belize, 726
- Curcumin, anticarcinogenic activity (rat), 761
- Cystic fibrosis
 acute pulmonary exacerbations, vitamin A status, 635
 lipid peroxidation in, β -carotene supplementation and, 87
 protein metabolism in (Editorial), 643
 protein turnover in, effects of feeding, 608
- Cytochrome P450, induction by dietary phytochemicals, effect on plasma lipids, 706
- Cytokine(s), peripheral blood mononuclear cell production, effects of vitamin C and E supplementation, 960
- Developmental disabilities, spastic quadriplegic cerebral palsy, energy expenditure pattern, 627
- Diabetes mellitus
 general perceived health of cardiovascular patients on prepackaged prepared meal plan, 935
 insulin-dependent (IDDM), bioelectrical impedance analysis in, 515S
 non-insulin-dependent, thermic effect of glucose in, effect of insulin or very-low-energy diet, 78
- Dialysis. See Hemodialysis; Peritoneal dialysis
- Diet
 amino acid-based, delayed tumor onset in transgenic mice, 748
 cardiovascular risk reduction diet, general perceived health of cardiovascular patients on prepackaged prepared meal plan, 935
 coronary heart disease progression (Editorial), 253
 dietary phytochemicals and plasma HDL cholesterol, 706
 effect of fat and fiber consumption on plasma and urinary sex hormones in men, 850
 effect of preexercise meal composition on plasma large neutral amino acids, 778
 fatty acid intake, plasma phospholipid content of very-long-chain n-3 fatty acids as biomarker, 305
 fruits and vegetables
 plasma carotenoid response, 594
 there is no substitute (Editorial), 381
 menstrual cycle phase-related fluctuations in plasma carotenoid concentrations, 559
 nutritional characteristics, eating pathology, and hormonal status of young women, 566
 relation to plasma hormones in premenopausal women, 25
 salicylate bioavailability, 743
 very-low-energy, effect on thermic effect of glucose in NIDDM, 78
- Dietary assessment, chronic low intakes of vitamin A in Nepal, 242

- Dietary intake, in spastic quadriplegic cerebral palsy, energy expenditure pattern, 627
- Digestion, colonic
fructooligosaccharides, 324
in short-bowel syndromes, 222
- Docosahexaenoic acid
microalgal oil, plasma fatty acid responses, metabolic effects, and safety in health adult males, 159
retroconversion and metabolism of ^{13}C -docosahexaenoic acid, 177
in visual and cognitive development, 40
- Dual-energy X-ray absorptiometry
body composition and bone mineral measurements in young men, comparison of two DXA instruments, 669
body composition of black versus white girls, 833
body fat and fat-free mass, 413S
in continuous ambulatory peritoneal dialysis, changes in peritoneal fluid and, 237
effects of calcium supplement withdrawal and puberty on bone mineral mass in children, 71
influence of body composition on bone mineral content in children and adolescents, 603
in peritoneal dialysis patients, 125
regional fat patterning in relation to pubertal stage in girls, 546
- DXA. *See* Dual-energy X-ray absorptiometry
- Eating disorders
nutritional characteristics, eating pathology, and hormonal status of young women, 566
symptoms in former gymnasts, relation to body composition, 840
- Edema, in protein-energy malnourished children, 952
- Editorial
Abdominal symptoms and lactose: discrepancy between patients' claims and results of blinded trials, 251
Aging, gastric acid secretion, and carotene status, 648
Biomarkers and dietary intake data are mutually beneficial, 379
Body fat distribution from subcutaneous to intraabdominal, 787
Changing perspective of carnitine function and the need for exogenous carnitine of patients treated with hemodialysis, 976
Decisive influence of diet on progression and reversibility of coronary heart disease, 253
Determinants of hyperhomocysteinemia: a matter of nature and nurture, 641
Does maternal supplementation shorten the duration of lactational amenorrhea? 377
Does poor zinc nutriture retard skeletal growth and mineralization in adolescents? 375
Food: what a surprise! 791
Fruits and vegetables: there is no substitute, 381
Glutamine supplementation in catabolic illness, 645
Human milk fortification for premature infants, 249
Iron fortification in Venezuela, 972
Nothing's simple about malnutrition: complexities raised by epidemic neuropathy in Cuba, 383
